ABOUT

Dedicated Information Technology student with analytical skills and a passion for innovative problem solving. Interested in emerging technologies and impactful digital solutions.

EDUCATION

- **B.Tech Information Technology**
Madras Institute of Technology 2023 – Present
CGPA: 8.46 / 10
- **HSC (12th Grade)**
Sri Sankara Matric Hr. Sec. School 2022 – 2023
Percentage: 98.6%
- **Foundation For Excellence (FFE) Scholarship Recipient**

PROJECTS

Smart Email Management System

C, SQLite, Data Structures

(View Repository)

- Developed a console-based email client using Queue and Linked List data structures for inbox and sent email management.
- Integrated SQLite database for persistent email storage with automatic loading of saved emails across application sessions.
- Implemented email validation, dynamic memory allocation, modular programming, and an interactive menu-driven interface.

AIT Connect: College Website Portal

React.js, JavaScript, HTML, CSS, Bootstrap

(View Repository)

- Developed a responsive React.js-based college website featuring academic programs, admissions, institutional information, and student service modules.
- Implemented reusable React components with React Router for seamless client-side navigation across multiple pages while ensuring a responsive and user-friendly interface.
- Designed an interactive web application with image carousels, course showcases, authentication pages, FAQs, and contact modules to enhance accessibility and user experience.

Online Voting System

Java, Spring Boot, Spring MVC, MySQL, Thymeleaf, HTML, CSS, JavaScript

(View Repository)

- Developed a secure web-based online voting system using Spring Boot with user registration, authentication, vote casting, and live election result tracking.
- Implemented Spring Data JPA with MySQL for efficient database management, session-based authentication, and prevention of duplicate voting.
- Designed a responsive web interface using Thymeleaf, HTML, CSS, and JavaScript to provide an intuitive voting experience with real-time result visualization.

CERTIFICATIONS

- **Python for Data Science – NPTEL** (View Certificate)
Elite Score: 78%
- **Advanced Excel Training – Udemy** (View Certificate)
Covered functions, dashboards, and financial modeling.

TECHNICAL SKILLS

Programming

- C, C++, Java, JavaScript

Web Technologies

- HTML, CSS, React JS

Database

- SQL

AI / ML

- Scikit-learn, NLP (SpaCy, NLTK)

Tools

- Microsoft Excel

Coding Profile

- LeetCode – 220+ Problems Solved

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Leadership
- Team Collaboration
- Time Management

COURSEWORK

- Object-Oriented Programming
- Data Structures and Algorithms
- Operating Systems
- Database Management Systems
- Natural language and image processing
- Machine Learning
- Computer Networks

VOLUNTEERING

- Blood Team Volunteer – YRC, MIT
- Web Team Member – Book Readers Club
- Librarian – PDA, MIT

LANGUAGES

Tamil

English

AREA OF INTEREST

- Technical Problem Solving
- Team Leadership
- Technology Exploration
- Classical Dance
